RE: Data Scientist

Dear Hiring Manager,

I am a new graduate of Master of Business Analysis (Data Science direction) and Master of Finance (Fintech direction). I believe my academic strengths and passion for creative solutions will be a positive addition to your team and support your organization's goals.

I enjoy innovation and love to experiment with different ideas and I am known for inspiring and devising original, thought-provoking concepts. I have cultivated talents in data analyst, feature engineering, and database management through diverse experiences. These skills, along with my passion for this field, align with the qualities you desire. I excel in a workplace that promotes a culture of consensus-driven and high-energy teamwork.

I have been using Python, R, MySQL, and Stata for years since my undergraduate degree. I am proficient in building Machine Learning models in python (regression, classification, and unsupervised learning), Nature Language Processing in R, and Data Visualization in Tableau. Also, I have very solid deep learning knowledge and big data sets (GBs of Json) processing experience. In addition, I have experience in using a variety of data mining tools such as Hadoop, Spark, Hive, MongoDB, NoSQL, Dataiku, etc. I strongly believe that my creative talents will prove to be a valuable resource, and I look forward to an interview with you. Looking forward to your reply.

Sincerely,

Haolin Chi
